WORK EXPERIENCE

Bannerse OÜ.

March 2025 – Present

Fullstack Senior Developer

Budapest, Hungary

- Maintained and modernized a legacy Vue.js application integrated with Cloudflare services.
- Designed and initiated development of a new multi-continental system supporting millions of users, including project planning and cross-team collaboration.
- Established and configured new codebases with code quality tools, unit testing frameworks, and CI/CD pipelines for both Laravel REST API and React.js frontend applications.
- Conducted code reviews, managed pull requests, and coordinated task assignments across the development team.
- Implemented analytics tracking with Google Analytics and PostHog to collect business and user behavior data for usability improvements.
- Collaborated with UX/UI designers to translate Figma prototypes into enhanced user interfaces and improved user experiences.

Captiwate Inc.

November 2024 – December 2024

Fullstack Senior Developer

Budapest, Hungary

- I worked on Captiwate's customer service solution as a full stack developer.

TMRW Applications Ltd.

July 2020 – September 2024

Fullstack Senior Developer

Budapest, Hungary

- TMRW is in the business of smart hotels which aims to bring every aspect of your reservations into a single mobile app - we also created the company's own PMS and integrated the app with many others.
- Designed and developed NTAK.guru as full stack developer.
 - NTAK.guru is a standalone multi-tenant application which can be integrated into multiple PMS applications and receive, build and send reports to the Hungarian government (NTAK and VIZA).
 - Utilizing queues, team-based permissions; Users have abilities to view, modify and resend reports.
- It was mostly my responsibility to host the applications and build the CI/CD.
- Collaborated with other developers (frontend, backend and mobile) and also I was responsible for reviewing other's Pull Requests.
